## Welcome

2A PharmaChem is a company located in Lisle, Illinois, in the west suburbs of the Chicago area. Our involvement is mainly based in the fields of marketing development, the domain of sales, and the technical support and last but not least, the high standard of customer service and satisfaction we provide from our ethical practices comprised of experts with deep industry experience looking to satisfy and meet your needs.

2A PharmaChem provides fine superior grade chemicals, pharmaceutical intermediates defined by the substances formed as a necessary stage in the manufacture of a desired end product, and finally, active pharmaceutical ingredients that we offer to the global market. Our goal is to make available those popular products to worldwide pharmaceutical and biotech companies, research organizations and university labs by providing them easy access to our services and products. Our online catalogue includes over 20,000 products you can slickly browse through. We offer our customers the ability to easily and comfortably select their desired products through our customized navigational search engine and process their purchase orders in a very effective and efficient way. The highly competitive prices we tender and the lead time information will become available to you right after you register on our website in a few easy steps.

2A PharmaChem has already proven itself as a successful, loyal, sincere and highly ethical company by establishing good rigid business relations with customers in the pharmaceutical and biotech industries in North America, South America, Europe, Japan, South Korea, and other countries in Asia. We have also founded and built wide and varied business channels and connections with China's chemical, pharmaceutical and biotech manufacturers.

2A PharmaChem has and always will unmistakably fulfill the principle of "Good Quality, Quick Delivery, Competitive Price, and Best Service"!

We always welcome all customers and vendors to cooperate business with us in order to achieve great mutual benefits.
